

Bowen jet stream spec sheet:

The variable-speed Jetstream Wind Machine makes special effects a breeze and adds a sense of motion to your shots. It's great for glamour shots or for controlling the smoke or fog on a set. For maximum gusts, turn the control to full power and you'll create 2400 RPM of controllable wind! Its remote operating cable enables you to control speed levels from up to 3m (10') away, so you can go from a light draft to a gentle breeze to an intense bluster without leaving your camera.

Bowens Jetstream Windmachine
